

## Global player in energy and services

Our group is a global reference in **low-carbon energy** and **services**.

In response to the urgency of climate change, our ambition is **to become the world leader in the zero carbon transition** of our customers, in particular businesses and local authorities. We rely on our key businesses (renewable energy, gas, services) to offer competitive turnkey solutions as a service.

With our 160,000 employees, our customers, partners and stakeholders, we are a community of **Imaginative Builders**, committed every day to more **harmonious progress**.

## **ENGIE** in the world

1°

World's leading independent power producer (IPP)

Europe's leading distribution network for natural gas

Europe's leading seller of natural gas storage

World's leading provider of energy-efficiency services

160,000 Employees in 70 countries

Research Centres

1,000 Researchers

21.5 gw

Production capacity of installed renewable energy

104 GW

Electrical capacity installed

5.2 GW Electrical capacity

Electrical capacity in construction

## **ENGIE** in Italy

**ENGIE in Italy** proposes global offers on the whole energy value chain, from supply to services, with particular attention to innovative products and solutions of energy efficiency and integrated management. Guided by the objective of accompanying communities and businesses in the zero carbon transition, we propose solutions that reconcile individual and collective interests. ENGIE is active in all segments, from residential to tertiary, public and private, up to small and large industry.

What we do Production, infrastructure and energy management through innovative and efficient solutions.

Sale of electricity and gas with production and supply of 100% green energy. Facility
Management
for integrated services
management to public
& private buildings and to
sports facilities.

Engineering and construction of any type of technological and energy plant. Energy efficiency to reduce consumption and the environmental impact of houses, businesses and cities.

**Green mobility**including supply, design,
installation and assistance
of charging facilities.

systems and microgrids
the property of a revolutionary
technology (HyESS™) allows
the integration of any intermittent
renewable energy source,
such as solar and wind, with
all forms of storage.

Advanced energy storage

**1**°

Player in energy services

Player in Energy Storage Solutions for green grids **2**°

Player in gas supply on wholesale market

Player in district heating **3**°

Player in Public Lighting

Player in electricity generation

Player in Demand Side Management

60 Offices

1 million customers

More than

**3**,300

Thermal Power Plants

200 MW Renewable energy (eolic, photovoltaic and biomass) 20 Cogeneration Plants

12 District Heating Networks

450,000 Lighting points

10,000 Buildings with Efficency Interventions included 3,500 schools

300 Municipalities Managed
